FIGURES RELEASED ON SPRING PLOWING, SOWING

As of 8 April 1949 spring plowing was almost 50 percent completed, 59.3 percent of the planned area of grain had been planted, and more than 66 percent of the land had been dragged. Prague Kraj had progressed furthest in its work, due primarily to the fact that most of the region is in flatland which can be worked early in the spring.

The table gives more detailed information.
